# Random facts

This is a cool API. It is really useful when the user is looking at a loading screen and you can display a fact while the screen is loading.

 [\*\*fungenerators.com/api/facts/\*\*](https://fungenerators.com/api/facts/)

The screenshot shows the Fungenerators website with a navigation bar at the top containing links for NAMES, NUMBERS & CODES, TEXT, TRIVIA, OTHERS, API, and ABOUT. The main heading is "Facts API" with a breadcrumb trail: Home / API Directory / Facts API. On the left, there is a sidebar with sections for "Subscription" (including Pricing and Subscription) and "General Options" (including End Point, Rate Limit, Authentication, and API Documentation). The main content area is titled "Random Facts API" and describes a full-fledged facts API with a database of thousands of entries, supporting subcategories and private facts storage. It includes a link to a random facts generator. Below this, the "API End Points" section provides the endpoint for connecting: `https://api.fungenerators.com`. The page also features social media icons for Facebook, Twitter, LinkedIn, Google+, and Email.

# Cryptocurrency

Coin API is great when you need something to show the price of cryptocurrency on your app from multiple decentralised exchanges.

 **coinapi.io**

The screenshot shows the CoinAPI.io website. The header includes the CoinAPI.io logo and a navigation menu with links: Product, API Docs, Pricing, FAQ, Support, Blog, and Log in. The main content area has a large heading "all cryptocurrency exchanges integrated under a single API". Below this, a subheading states: "CoinAPI is a platform which provides fast, reliable and unified data APIs to cryptocurrency markets." There are two buttons: "GET A FREE API KEY" and "CONTACT SALES". To the right, there is a 3D isometric diagram showing a central orange cube labeled "CoinAPI" connected by dashed lines to several smaller colored cubes (red, pink, purple, green, cyan) representing different exchanges. A callout bubble points to one of the cubes with the Kraken logo.
